

What's New in Waahi v2.16.0.1

Issues Addressed in this Release:

- [#17190] Results Widget issue when layer has no related data

Known Issues

- Data Export widget - services is not currently working and needs to be upgraded to make use of ArcGIS Pro like the Print services now does.
- Print Plus - the legend in map layouts shows Selections and drawings on the map as "Override 1", "Override 2" etc.
- Search Plus - Wildcard searching on coded value domain fields isn't currently supported.

Version acceptance:

- **ArcGIS Enterprise Version 10.7.1**
- **Web AppBuilder 2.16**
