

## What's New in Waahi v2.16.0.2

### Widgets enhanced in this release:

- Print Plus [#17342] - Print Plus widget to work with hosted Vector Tile Layers

### Known Issues

- Data Export widget - services is not currently working and needs to be upgraded to make use of ArcGIS Pro like the Print services now does.
- Print Plus - the legend in map layouts shows Selections and drawings on the map as "Override 1", "Override 2" etc.
- Search Plus - Wildcard searching on coded value domain fields isn't currently supported.

### Version acceptance:

- **ArcGIS Enterprise Version 10.7.1**
- **Web AppBuilder 2.16**
